	Cultivated area, Total	Acres	..	x	0	0	30	32	27	27

**Data Source:** Statistics Canada. Table 32-10-0364-01 Area, production and farm gate value of marketed fruits

**Symbol legend:**

..	not available for a specific reference period
x	suppressed to meet the confidentiality requirements of the Statistics Act
E	use with caution
F	too unreliable to be published

**Footnotes:**

- 1 Data expressed in imperial and metric units of measure may not always be equivalent due to rounding.
- 2 Commodity names have been adjusted to align with the Variant of North American Product Classification System (NAPCS) Canada 2017 Version 2.0 - Agricultural goods. These commodities include fresh and processed fruits.
- 3 Prior to 2018, fresh blackberries, fresh currants and fresh haskaps were included in the other fresh fruits category. As of 2018 they are published in their own categories in this table.
- 4 On February 16, 2024, total production and farm gate value estimates for fresh lowbush blueberries, total fresh blueberries and total fresh fruits were revised for reference year 2020. The following geographies were revised: Quebec and Canada.
- 5 Cultivated area includes bearing and non-bearing area.
- 6 Conversion factors used for 1 bushel of apples from 1926 to 1964 equals 45.0 pounds, 1965 equals 44.5 pounds, 1966 equals 44.0 pounds, 1967 equals 43.5 pounds, 1968 equals 43.0 pounds, 1969 equals 42.5 pounds, from 1970 on equals 42.0 pounds.
- 7 The value of the crop from 1984 onward is not comparable to previous years because of a change in reporting techniques for New Brunswick only.
- 8 As of April 27, 1983, revisions back to 1926 in British Columbia were carried out to reflect that 1 quart equals 1.25 pounds.
