

Health PEI

Please arrive 20 minutes before your scheduled appointment. Patients who arrive late may need to have their appointments rescheduled. Please bring your provincial health card.

CT Pelvis with Contrast – Evening Exam Preparations

1. Only drink clear fluids, no solid food for 4 hours prior to your appointment time.
2. Due to evening appointment, Gastrografin is adjusted as follows:
 1. Mix one bottle of Gastrografin (30 ml) with 900 ml of water or clear juice
 2. Drink half of the mixture at 7AM the day of your examination.
 3. Drink the remaining half of the mixture one hour prior to the examination

NOTE:

It is imperative that the Gastrografin is diluted into the water or juice in the exact proportions stated above.

3. A full bladder is needed for the exam, so please do not void or empty your bladder for 1 hour prior to your exam
4. You may take your medications.
5. Insulin dependent diabetics may eat a regular diet.

Gastrografin can be picked up in the Radiology Departments at any of the following sites:

Queen Elizabeth Hospital, Prince County Hospital, Kings County Memorial Hospital, Souris Hospital, Community Hospital, Western Hospital.

Please take this preparation sheet with you when you pick up your Gastrografin.
