Public School Education

In Prince Edward Island, the public school system embodies kindergarten through grade 12. For program planning purposes, four Key Stages categorize grades as follows:

- Key Stage 1 - Primary grades of K-3
- Key Stage 2 - Elementary grades of 4-6
- Key Stage 3 - Intermediate grades of 7-9
- Key Stage 4 - Senior high grades of 10-12

The provincial public education program is taught in schools organized within the Public Schools Branch and La Commission scolaire de langue française.

A full school program is available for both English language and French language education. The schools of La Commission scolaire de langue française operate in the French language. Second language courses are available in all schools, with instruction beginning no later than grade four. Early French immersion and late French immersion programs are available in some English language Schools.

Additional information on public education is available on the Department of Education and Early Years website <https://www.princeedwardisland.ca/en/topic/education-and-lifelong-learning>

Philosophy of Public Education

A Philosophy of Public Education for Prince Edward Island Schools was adopted in 1990. It contains a statement of the purpose, principles, and goals, summarized below, along with the supporting rationale and context.

Purpose

The purpose of the Prince Edward Island public education system is to provide for the development of children so that each child may take a meaningful place in society.

Basic Principles

Public education in PEI is based on a quality program that respects the intrinsic value of the individual and centres on the development of each child.

The public education system recognizes that education is a responsibility shared among the school, the family, and the community.

The public education system demonstrates respect and support for fundamental human rights as identified in the *Canadian Charter of Rights and Freedoms* and the *PEI Human Rights Act*.

The public education system reflects the character, cultural heritage, and democratic institutions of the society it serves.

The public education system programs reflect a current view of the knowledge, skills, attitudes and competencies of most worth to the individual and society.

The goals of public education are to enable the student to

- develop an appreciation for learning, an intellectual curiosity, and a desire for lifelong learning;
- develop the ability to think critically, apply knowledge, and make informed decisions;
- acquire the basic knowledge and skills necessary to comprehend and express ideas through the use of words, numbers, and other symbols;
- develop an understanding of the natural world and of the applications of science and technology in society;
- acquire knowledge about the past and an orientation to the future;
- develop an appreciation for one's heritage and a respect for the culture and traditions of others;
- develop a sense of self-worth;
- develop a respect for community values, a sense of personal values, and a responsibility for one's actions;
- develop a sense of pride and respect for one's community, province, and country;
- develop a sense of stewardship for the environment;
- develop creative skills, including those in the arts, and an appreciation of creativity in others;
- develop skills and attitudes related to the workplace;
- develop good mental and physical health, and the ability to use leisure time creatively;
- acquire knowledge of the second official language and an understanding of the bilingual nature of the country;
- develop an understanding of gender equity issues and of the need to provide equal opportunities for all;

- develop an understanding of fundamental human rights and an appreciation for the worth of all individuals.

The provincial curriculum is of prime importance in addressing the goals. The curriculum may be defined as all of the experiences, formal and informal, which the student encounters under the school's guidance. This document, Program of Studies and List of Authorized Materials, outlines the formal school program.

Curriculum guides clearly articulate what students are expected to know and be able to do. Delivery of curriculum must reflect these expectations, and there must be an accurate assessment of students' performance concerning the curriculum outcomes.

English Programs

Mandate

The English Education, Programs and Services Division provides quality English language curriculum and support services to teachers and students. It provides leadership and coordination in the development of quality learning opportunities for all students.

There are more than 200 programs and courses in the public school curriculum. With such a large number of courses, course development and renewal are a continuous one. The procedures for conducting such work are described below.

Program and Course Development/Renewal Procedure

Renewal of curriculum begins with the common understanding that Grades K-12 students must be educated to participate in a world of rapid and complex change. This dynamically evolving environment requires that students develop multiple literacies that increase depth of knowledge and acquire a range of competencies. Students must also develop a desire for personal and collective achievement and a willingness to collaborate for the well-being of themselves, others, and their planet.

With these and other worthy goals in mind, everyone involved in Prince Edward Island students' education must have an in-depth understanding of grade-level expectations for learning in all areas of study.

Since the implementation of the 2006 Student Achievement Action Plan, which resulted from the PEI Task Force report on Student Achievement, curriculum development and renewal has been, and continues to be, a priority. Island teachers continue to be actively involved in working with Department leaders to create and develop provincial curriculum. The goals of curricular renewal are achieved through:

- clarifying expectations, outcomes, standards, and benchmarks for students;
- ensuring relevance and consistency for all students across grade levels and areas of study;
- focusing on central tenets and developing deep understanding within areas of study (which are living disciplines);
- incorporating effective research-based instruction and assessment practices, and providing ease of access and use for teachers; and
- promoting a contextualized and constructivist approach to instruction and learning.

Teachers and Department leaders collaborate in evaluating and selecting appropriate student and teacher resources to support the curriculum with consideration for the following six actions:

1. The Department of Education and Early Years assesses the effectiveness of existing programs and school courses in consideration of the province's educational goals and students' needs. The following information is used as part of the assessment process:
 - a. reports from teachers;
 - b. submissions from school authorities;
 - c. submissions from community groups;
 - d. government studies and initiatives;
 - e. academic and professional literature in education; and
 - f. results of provincial, national and international assessments.
2. The decision to proceed, or not, with the development of a revision project is made by the Department based upon:
 - a. the result of the assessment;
 - b. the impact on other existing courses/programs;
 - c. recommendations from appropriate curriculum committees; and
 - d. fiscal considerations.
3. The curriculum development work is carried out by an ad hoc curriculum committee in conjunction with a Department of Education and Early Years leaders. Nominations to a committee are requested from education authorities, and, if appropriate, from educational partners, such as Holland College or the University of Prince Edward Island. The committee
 - a. assesses strengths and weaknesses of the present course or program;
 - b. determines, with reference to provincial education goals and any appropriate foundation documents, the outcomes for the new or revised course;
 - c. evaluates instructional materials;
 - d. outlines a course of studies; and
 - e. makes recommendations on pilot projects and in-service training for pilot teachers.
4. Based on recommendations from the ad hoc committee, the leader
 - a. submits a request to the Director for final approval;
 - b. consults with education authorities to identify pilot schools and teachers; and
 - c. ensures that pilot materials are ordered, and that appropriate in-service training is carried out.

5. The Department of Education and Early Years monitors the progress of each pilot projects and
 - a. recommends discontinuing the project, continuing the project, or proceeding to implement a new or revised course;
 - b. revises, as needed, the course of study to reflect any course changes; and
 - c. makes provision for in-service training and other supports that will ensure effective implementation.
6. The Department of Education and Early Years will prioritize the following areas of learning for program and course renewal;
 - a. essential graduation competencies
 - b. inquiry-based learning
 - c. project-based learning
 - d. experiential learning

Position Statements

Education for Reconciliation

The English and French Education, Programs and Services Divisions are committed to meeting the Truth and Reconciliation Commission of Canada's (TRC) Calls to Action. Sections 62 and 63 deal with education, specifically development of curriculum and the building of student capacity for intercultural understanding, empathy, and mutual respect. Education has played a role in the past regarding Indigenous Peoples and understand that education is the way forward.

**“Education got us into this mess
and education will get us out of it.”
~The Honorable Justice
Murray Sinclair**

the

While reconciliation may take on many meanings, the TRC defines it as “...establishing and maintaining a mutually respectful relationship between Aboriginal and non-Aboriginal peoples in this country. In order for that to happen, there has to be awareness of the past, an acknowledgement of the harm that has been inflicted, atonement for the causes, and action to change behaviour.” Truth must come before reconciliation.

Teaching Education for Reconciliation within the provincial curriculum relates to what is taught in schools in the form of its various subject-area programs, but also to how it is taught. Meaningful reconciliation must engage students in learning about Canada’s history of colonization, thinking creatively about the future, and providing them with opportunities to make a difference through active citizenship. As the Kindergarten to Grade 12 curriculum is renewed, the new curriculum must enable students to develop an understanding of - and respect for - the histories, contributions, and perspectives of Indigenous peoples in Prince Edward Island and Canada.

The English and French Education, Programs and Services Divisions would like to thank the Indigenous Education Advisory Committee for its guidance as we continue on our path to reconciliation. Their unique perspectives, voices and experiences are very much appreciated. The English and French Education, Programs and Services Divisions acknowledge that there are other perspectives and voices still to be heard and encourages teachers to seek out local knowledge keepers in their communities to further their understanding of Indigenous culture, knowledge and ways of knowing.

The English and French Education, Programs and Services Divisions recognize that many teachers will be learning alongside their students. Teachers are encouraged to seek opportunities to educate themselves on matters of Indigenous culture in order to teach from a place of empathy and knowledge and to become effective allies in reconciliation education. This learning can take the form of formal learning experiences such as professional development opportunities, courses focused on First Peoples’ cultures, or other learning experiences such as engaging in professional discussions with colleagues or connecting with local First Nations communities or Indigenous organizations.

¹Honouring the Truth, Reconciling for the Future Summary of the Final Report of the Truth and Reconciliation Commission of Canada, The Truth and Reconciliation Commission of Canada, 2015, p. 6

Education for Sustainable Development

The English and French Education, Programs and Services Divisions are committed to identifying and supporting entry points to the topics of sustainability in existing programs and explicitly including specific curriculum outcomes and achievement indicators in newly developed curricula.

Education for Sustainable Development (ESD) is critical to addressing the global challenges facing humanity today. ESD is transdisciplinary and holistic. ESD plays an important role in engaging learners in an understanding of the interconnectedness of social, economic, and environmental issues, and how their actions impact the world around them.

ESD is a way to empower learners to take individual and collective action towards sustainability. It equips learners with the “knowledge, skills, values, and agency to address interconnected global challenges” in the hopes of “meeting the needs of the present without compromising the ability of future generations to meet their own needs.”

³“Sustainability | United Nations.” the United Nations, <https://www.un.org/en/academic-impact/sustainability>. Accessed 6 October 2023.

Fair Presentation of Cultural and Other Groups

The Department of Education and Early Years recognizes that fair comment respecting any group is to be assured in school. Furthermore, stereotypes are to be avoided, whether in association with gender or any other characteristic. Therefore, in the curriculum planning process, curriculum committees, curriculum specialists, and the coordinator are directed as follows:

- a. To evaluate aims, instructional materials, and courses of study to ensure fair and reasoned comment upon the characteristics or practices of any cultural group. Fair and reasoned comment is characterized by, for example, providing clear and reasonably complete explanations of characteristics and practices, distinguishing between facts and inferences or value judgements in discussions of characteristics and practices, and discouraging students from making hasty value judgments about characteristics and practices of specific cultures.
- b. To evaluate educational aims, instructional materials, and courses of study to ensure that people's generalizations are based upon reasonable evidence and that stereotypes are avoided.

The resource called *Evaluation and Selection of Learning Resources: A Guide* is used to evaluate instructional materials.

The following guidelines apply in evaluating instructional materials:

1. Texts and other instructional materials should portray a wide variety of occupations, activities, and interests as being equally suitable for diverse gender identities.
2. Human experiences presented in textbooks should include references to diverse gender identities.
3. Messages about society and an individual's place in it should imply equality of diverse gender identities.
4. The resource can be accessed at www.gov.pe.ca/photos/original/ed_ESLR_08.pdf

English Programs Kindergarten Through Grade 6

A Flexible Integrated Model

Key Stages One and Two are characterized by a flexible integrated model. This is based on the following beliefs and understandings:

- Student achievement will result from a combination of discrete and connected teaching/learning experiences.
- There are commonalities among the outcomes for the curriculum areas of language arts, math, science, social studies, visual arts, technology and health, and connections will be made wherever it is logical and natural to provide for integrated learning experiences.
- This model supports 21st century learning along with the development of information literacy through a resource-based, project-based learning and inquiry process learning approach.
- Communication Information Technology (CIT) outcomes are to be integrated across curriculum areas.

Kindergarten

The kindergarten program of Prince Edward Island fosters children's growth and learning socially, emotionally, intellectually, physically, and creatively to become lifelong learners in an environment that is nurturing, play-based, and developmentally appropriate.

The kindergarten program accommodates the broad range of children's needs and their learning rates and styles, which facilitates continuous learning. This is accomplished through an integrated curriculum that incorporates various instructional models, strategies, and resources, to begin to establish fundamental knowledge and skills.

Key Stages One and Two (Grades 1-6)

For students to establish fundamental knowledge and skills, The Department of Education and Early Years has set Key Stage One goals of

- focusing on the Pillars of Literacy,
- expanding the play-based experience, and
- integrating the curriculum.

As such, students have opportunities to

- establish fundamental knowledge and skills, and
- meet grade three standards for achievement in literacy and numeracy.

For students to apply and enhance the fundamentals, the Department of Education and Early Years has set Key Stage Two goals of

- integrating the curriculum, and
- providing classroom libraries.

In Key Stage Two, students have opportunities to

- apply Key Stage One skills and knowledge,
- develop stamina,
- close gaps in learning,
- develop abstract thinking, and
- explore higher-order thinking.

Time on Task

The Grades 1-6 model acknowledges that some discrete teaching/learning must occur in the context of these specific subject areas. These curriculum areas, along with LDT (Locally Determined Time – or time that can be used to provide unique learning opportunities that are responsive to a specific school community), account for between 75% and 85% of the school day.

Key Stage One (Grades 1-3)

Language Arts – 45%	Math – 20%	Visual Arts – 5%
Health – 4%	Science – 3%	Social Studies – 3%
Physical Education – 5%	Music – 5%	
Locally Determined Time (LDT) – 5%		

Key Stage Two (Grades 4-6)

Language Arts – 30%	Math – 20%	Visual Arts – 5%
Health – 5%	Science – 5%	Social Studies – 5%
Physical Education – 5%	Music – 5%	Core French – 10%
Locally Determined Time (LDT) – 5%		

Note: The Integrated Curricula (Grade 5 - 5INTA; Grade 6 - 6INTA) combine the percentages from Art, Health, Science and Social Studies (20%)

Although this is expressed in terms of a school day (300 minutes including recess – 5%), teachers may find it useful to think about time for some subject areas in terms of time blocks rather than a percentage of time each day. For example, during a six-week block, the focus may be on Science rather than social studies. In another six-week block, the focus may shift to social studies.

This model also recognizes music and physical education as distinct specialist areas. There are opportunities for integration between these specialist areas and other curriculum areas that can be capitalized on when they occur (e.g., music and language arts, music and math, music and social studies). Please note that core French is also a distinct special area in Grades 4-6.

Course Codes for Elementary School Subjects

For purposes of gathering data, a unique course code is used for each school subject. The meaning of the course codes is explained below.

The course code may be used wherever the name of a particular school subject is used in this Document.

Course Coding System

The unique course code is composed of five characters. Each course code also has a course title associated with it.

Number of Characters	Field	Description
1	Grade	K = Kindergarten 1 = Grade 1 2 = Grade 2 3 = Grade 3 4 = Grade 4 5 = Grade 5 6 = Grade 6
3	Subject	Example: MAT = Mathematics, MUS = Music
1	Program	The fifth character is used as a program identifier as well as to distinguish between courses that would otherwise be identical in their coding. A to E = English-language courses F to J = French immersion courses M to Q = French-language courses W to Z = local program courses

Examples:

3MATA = Grade 3, Mathematics, English

5LANF = Grade 5, Language Arts, French Immersion

Abbreviations

Most of the instructional materials listed for the school programs and courses described in this document appear as indicated by the following example:

Title and Author	Publisher	Ratio	Stock Abbreviation Number
Robin Run by Thorn	NEL	1/p	104-0825

Please note:

1. The publisher abbreviations and the publishers are listed on the following pages.
2. The ratios at which instructional materials are provided have meanings as indicated by the following examples:
 - 1/p - one per pupil
 - 1/10p - one per 10 pupils
 - 1/t - one per teacher
 - 1/c - one per class
 - 1/s - one per school
 - 1/u - one per education authority
 - 1/ws - one per work station
 - cs/s - one class set per school
 - cs/t - one class set per teacher
3. The item number is a unique number for each item. The numbers are assigned by the Provincial Learning Materials Distribution Centre (PLMDC).
4. There is a unique course code for each subject in the curriculum and the course code for each section is explained. Furthermore, the code is used at the beginning of the description of each course.

English Programs

Kindergarten

The following vision shapes the English kindergarten curriculum:

The kindergarten program of Prince Edward Island fosters children's growth and learning: socially, emotionally, intellectually, physically, and creatively to become lifelong learners in an environment that is nurturing, play-based, and developmentally appropriate.

Integrated Curriculum

The following philosophy defines the kindergarten integrated curriculum:

Kindergarten is a child-centred, developmentally appropriate, early childhood program for children in the year prior to grade one. The purpose of kindergarten is to nurture the continuing growth of children's knowledge and understanding of themselves and their world by providing a safe, caring, and play-based stimulating environment where learning flourishes.

The kindergarten program on Prince Edward Island recognizes that children are individuals and that every child is unique. The program accommodates that broad range of children's needs and their learning rates and styles, which facilitates continuous learning. This is accomplished through an integrated curriculum that incorporates various instructional models, strategies, and resources.

Curriculum integration provides educators with a practical approach to connect outcomes in a meaningful way. It is a holistic approach that reflects the real world and prepares children for lifelong learning. Integration is, above all, a practice that is not learned or taught but is lived.

The kindergarten program values the development of the whole child by recognizing:

- the individual and social nature of learning;
- that children learn through active involvement and meaningful play;
- the importance of developmentally appropriate practices that enhance children's learning;
- the significance of all areas of development;
- the early years as the strong foundation for lifelong learning.

Visual Arts

Please Note: [see Grade 6 Integrated Curricula \(6INTA\) for Grade 6 Visual Arts](#)

[see Grade 5 Integrated Curricula \(5INTA\) for Grade 5 Visual Arts](#)

The Prince Edward Island Visual Arts curriculum is fundamental to a learners aesthetic, physical, emotional, intellectual, and social development. Visual arts education connects to every area of learning, engages our imagination and allows us to explore our identities, life experiences and emotions, as individuals or members of a diverse global community. Art making is a vehicle through which learners make meaning of the adventures of life and make connections between the world they and others experience.

The Grades 1- 4 Visual Arts curriculum aims to develop the following outcomes:

- Fundamental Concepts
- Creating & Presenting
- Reflecting, Analysing, & Responding
- Form & Cultural Context

The Integrated Curricula for Grades 5 and 6 Visual Arts aims to develop the following outcomes through their artmaking:

- Expressing Self
- Communicating Meaningful Messages
- Creating unique art using Materials, Tools & Techniques
- Understanding Culture, Heritage and Environment

The aim of the visual arts elementary curriculum is to develop foundational visual art literacy skills with outcomes explored through creative critical art making, and viewing grade level concepts using the lens of art making to learn about their world. An essential part of art literacy is developing an understanding of the nature of the arts, which includes a sense of what artists do as individuals and as a community, how ideas are generated in the various art media, and what benefits are associated with these activities. Visual arts can be regarded as a ‘text’ or commentary that reflects, records, celebrates, and passes on innovations and traditions that make us unique. Throughout PEI, many art education opportunities are offered for students, such as those at the Confederation Centre of the Arts, Eptek Art & Culture Centre, community museums and cultural festivals.

The visual art curriculum requires:

- a learner-centred art making environment with easily accessible art supplies and art showcase areas
- art making integrated with classroom curriculum learning
- art making to recognize the seasons, celebrations and everyday activities.

Confederation Centre of the Arts Art to the Schools Collection	Eptek Art & Culture Centre	community museums cultural festivals

Communication and Information Technology (CIT) Integration

Please Note: [*see Grade 6 Integrated Curricula \(6INTA\) for Grade 6 Technology Integration*](#)

[*see Grade 5 Integrated Curricula \(5INTA\) for Grade 6 Technology Integration*](#)

Rationale:

To focus on how communication and information technology can be used from kindergarten through Grade 6 across all areas of the curriculum as part of a more global strategy that will contribute to the development of technologically competent and literate individuals graduating from our school system.

Advantages of Technology Integration:

Integration of technology into the curriculum

- ensures that curriculum is the principal focus, rather than technology;
- promotes the development of creative thinking, critical thinking, research, communication, and problem-solving skills;
- provides access to rich resources and learning experiences that can extend far beyond those offered in traditional classrooms;
- motivates students to complete learning tasks and become more readily engaged in their own learning;
- supports current research which suggests that people learn in a holistic fashion rather than in a compartmentalized manner;
- supports contemporary approaches to education such as cooperative learning, constructivism, resource-based learning, and individualized learning;
- provides teachers with an additional means to address multiple learning styles;
- provides students with the opportunity throughout their school career to expand and reinforce their repertoire of technology skills;
- enables students to acquire a better understanding of how to use technology in meaningful ways;
- ensures that all students have the opportunity to develop technological competencies;
- prepares students to select appropriate technologies to complete tasks;
- provides teachers with an opportunity to model lifelong learning as students witness teachers learning and using new skills for a purpose.

The documents Working Toward Communication and Information Technology Literacy Kindergarten to Grade 6 have been distributed and implemented. These documents contain descriptions of CIT outcomes, lesson plans, and links to specific curriculum outcomes.

These documents are also available online at:

<https://www.princeedwardisland.ca/en/information/education-early-learning-andculture/communication-and-information-technology-curriculum>

Elementary Technology Resources:

Online curriculum guides, professional development resources and specific grade level lesson plans:

Software, Applications, and Extensions

Approved software, applications, and extensions for student learning can be found by using the following link:
<http://bit.ly/peiapps>

This is a living resource, software, application, and extension are added or removed on an ongoing basis based on an evaluation process. Applications/extensions are available to users who log into their @cloud.edu.pe.ca accounts. These applications may be updated, changed, or added to without notice.

Core French

Grades 1-3 will be handled on a local pilot basis.

Grades 4-6

Description

The Core French program in grades 4-6 is taught using a literacy approach, and also reflects the influence of the action-oriented approach presented in the Common European Framework of Reference for Languages. The program focuses on the development of all four communication skills – listening, speaking, reading, and writing – in French, with particular emphasis on spoken interaction. As well, the program contributes significantly to the general education of the learner.

The program is organized around modules that reflect the interests and experiences of the elementary student with each module culminating in the completion of a final task. Throughout each module, students are actively involved in a variety of activities and tasks which allow for meaningful, authentic communication to occur in French; consequently, students acquire knowledge and language skills through their use of the vocabulary and sentence structures needed to complete various activities and tasks.

Time allocation for Core French Programs

Classes of 60 minutes every other day provide students with an authentic and intensive language learning experience. A sixty-minute class is needed, not only to maximize the opportunities for students to develop their French skills but also to teach using the literacy-based approach of the Core French program.

Health Grades 1-6

Please Note: see [*Grade 6 Integrated Curricula \(6INTA\) for Grade 6 Health*](#)

[*see Grade 5 Integrated Curricula \(5INTA\) for Grade 5 Health*](#)

Health education involves learning about the habits, behaviours, interactions, and decisions related to healthy daily living and planning for the future. The home, school, and community play important roles in contributing to the healthy personal development of students by providing an opportunity for them to consider information and acquire, practise, and demonstrate strategies for dealing with the challenges of life and living.

The aim of the health curriculum is to enable students to make well-informed, healthy choices and to develop behaviours that contribute to the well-being of self and others.

The specific outcomes for the Grades 1-5 health curriculum are organized in three strands:

- Wellness Choices;
- Relationship Choices; and
- Life Learning Choices.

Integration of health content with other curriculum areas is encouraged.

Additional Notes

1. Before addressing any human sexuality outcomes, teachers must provide parents/guardians with information about the content. The minimum expectation is to inform parents/guardians by letter.
2. Before beginning the personal safety/abuse prevention outcome, the minimum expectation is to inform parents/guardians by letter.

Integrated Curricula

The vision for the Prince Edward Island Integrated curricula is to enable and encourage students to explore the world around them through an integrated, transdisciplinary lens. This approach emphasizes natural connections within the curriculum and makes learning more authentic and relevant for students. It dissolves the boundaries between traditional subjects and organizes them into conceptual lines of inquiry to promote integrated thinking at a deeper level. “When learners are able to go beyond the facts and basic skills to see patterns and connections to related concepts, and when they can understand the deeper, transferable significance of their learning, then their thinking is integrated at a conceptual level” (Erickson, Lanning & French, 2017, p.15). The Integrated curriculum capitalizes on the interconnected nature of knowledge and aligns with how real-world challenges are addressed.

In particular, the Integrated curricula is aimed at equipping students with the essential competencies required to navigate the modern world by:

- providing opportunities for inquiry, critical thinking, problem-solving and reflection;
- mirroring the dynamic, interconnected nature of knowledge through conceptual lines of inquiry;
- engaging students with relevant contexts that span across different domains such as environmental sustainability and Indigenous ways of knowing;
- involving students in learning activities that develop SEL and value diversity, equity and inclusion; and
- providing learning challenges that will empower students to make positive differences in their community and the world.

5INTA Grade 5 Integrated

Description

5INTA combines the topics within the disciplines of Science, Social Studies, Health and Visual Arts. It leverages the contexts within these disciplines to engage students in developing the knowledge, skills and attitudes associated with inquiry, social emotional learning, digital technology and diversity, equity and inclusion. The topics addressed within each discipline of the Grade 5 Integrated Curriculum include:

Science • Structures and functions of major body Systems • Weather and climate • Physical and chemical changes • Simple machines	Social Studies • Mapping and physical Regions • Mi’kmaq lifestyle • Mi’kmaq decision making practices • Mi’kmaq historical interactions	Health • Healthy lifestyles • Future roles and career pathways • Personal safety • Changes during puberty	Visual Arts • Expressing self • Communicating messages • Materials, Tools and Techniques • Culture, Heritage and Environment
---	--	--	---

6INTA Grade 6 Integrated

Description

6INTA combines the topics within the disciplines of Science, Social Studies, Health and Visual Arts. It leverages the contexts within these disciplines to engage students in developing the knowledge, skills and attitudes associated with inquiry, social emotional learning, digital technology and diversity, equity and inclusion. The topics addressed within each discipline of the Grade 6 Integrated Curriculum include:

Science • Diversity and organization of living things • Solar system • Electricity and electric circuits • Forces and factors in flight	Social Studies • Maps and cultural regions • Culture in PEI • Changes in PEI over time • Human rights	Health • Healthy lifestyles • Future roles and career pathways • Personal safety • Human reproductive system	Visual Arts • Expressing self • Communicating meaningful messages • Materials, tools and techniques • Culture, heritage and environment
--	--	---	--

Language Arts

The English language arts curriculum is shaped by the vision of enabling and encouraging students to become reflective, articulate, literate individuals who use language successfully for learning and communicating in personal and public contexts.

The curriculum is defined in terms of outcomes organized around the processes of speaking and listening, reading and viewing, and writing and other ways of representing. These outcomes are contained in the following documents:

- Atlantic Canada English Language Arts Curriculum: Grades Entry-3
- Atlantic Canada English Language Arts Curriculum: Grades 4-6
- CAMET Reading and Writing Achievement Standards Grades 1-6
 - Reading Achievement Standards Grade 1
 - Writing Achievement Standards Grade 1
 - Reading Achievement Standards Grade 2
 - Writing Achievement Standards Grade 2
 - Reading Achievement Standards Grade 3
 - Writing Achievement Standards Grade 3
 - Reading Achievement Standards Grade 4
 - Writing Achievement Standards Grade 4
 - Reading Achievement Standards Grade 5
 - Writing Achievement Standards Grade 5
 - Reading Achievement Standards Grade 6
 - Writing Achievement Standards Grade 6

Grades K-3 Resources

For Grades K-3, the resources include Literacy Place for the Early Years, Foundations and decodable texts. Literacy Place resources provide Read Alouds, Shared Reading, Guided Reading and Independent reading materials with a selection of fiction and informational text types. The writing section incorporates Modelled, Shared, Guided, and Independent Writing into text-type studies, literature responses, and independent writing. The Foundations program is a cornerstone of a structured literacy approach building strong foundational reading skills through direct instruction in phonemic awareness, phonics, word study, vocabulary, fluency, and comprehension strategies. Decodable texts are designed to support the phonics patterns and vocabulary being taught through the scope and sequence of the Foundations program

Grades 4-6 Resources

The Grades 4-6 resources are Moving Up With Literacy Place. These materials were selected to accommodate a wide range of multi-level reading materials, learning styles, and interests. The resources are based on a strategy approach to literacy instruction and learning, and include eight strategy units, book clubs, and guided reading materials.

The resources from Grades K-6 are intended to engage students, inspire talk about texts, and encourage reading, viewing, writing, and other ways of representing.

Teachers are encouraged to refer to the Program Design and Components of the English Language Arts Curriculum Guide, both Entry-3 and 4-6 for guidance and appropriate instructional practices.

Mathematics

Description

The Prince Edward Island mathematics curriculum is shaped by a vision which fosters the development of mathematically literate students who can extend and apply their learning and who are effective participants in an increasingly technological society. The teaching and learning in mathematics activities and classrooms should enable all students to:

- learn to value mathematics;
- become confident in their ability to do mathematics;
- become mathematical problem solvers;
- learn to communicate mathematically;
- learn to reason mathematically.

Fundamentally, mathematics is a set of ideas. The intent of the PEI mathematics curriculum is to ensure that students understand these ideas, not just master the rules and procedures. At the same time, it is essential that students accomplish a certain level of skill proficiency so that they have the tools to solve interesting and relevant problems. Practice of skills is usually more effective if the practice arises in meaningful contexts.

The outcomes for the mathematics curriculum are organized in terms of four content strands:

- number;
- patterns and relations;
- shape and space; and
- statistics and probability.

Intended to permeate teaching and learning, the seven mathematical processes are unifying concepts that serve to link the content to methodology. The seven interrelated mathematical processes are:

- communications;
- connections;
- mental mathematics and estimation;
- problem solving;
- reasoning;
- technology; and
- visualization.

In summary, instructional practices in mathematics should promote:

- classrooms as mathematical communities;
- logic and mathematical evidence as verification;
- mathematical reasoning;
- conjecturing, inventing, and problem-solving;
- connecting mathematics, its ideas, and its applications;
- visualization; and
- mental computation.

The PEI elementary mathematics curriculum guides provide specific curriculum guidance for teachers and students. Various mathematical manipulatives and models are mentioned throughout the curriculum and suggested resource: these hands-on tools are necessary to develop students' mathematical thinking by encouraging concrete, pictorial, and symbolic understanding of concepts.

The elementary math curricula is based on the Western and Northern Canadian Protocol (WNCP). The curricula was updated in 2023-2024 to increase time and focus on development of number sense.

Music

Description

Music is a language that we must explore and experience to fully understand its unique characteristics. This elementary music curriculum embraces the discovery of the musical language using a sound before symbol, learner-centred process in which learners and music specialists engage in purposeful musical play to develop musical literacy skills. All grade level elements, concepts, and skills need to be experienced and demonstrated using voice, body, and instruments before identifying the musical language symbol. Foundational learnings need to be experienced, demonstrated, and identified before moving onto more complex musical elements. Formative elements, concepts, and skills will continue to be expanded upon throughout the intermediate and high school years.

The Grades K-6 elementary music curriculum aims to develop the following outcomes:

- Creating & Composing
- Musical Elements
- Musical Artistry
- Cultural Contexts & Connections
- Sharing & Performing
- Reflecting, Responding, & Analyzing

The aim of the elementary music curriculum is to develop foundational music literacy skills with outcomes explored through movement, dramatization, improvisation, composition, active listening, instrument playing, and vocalization using songs, Orffestrations, listening selections, games, and activities from a variety of diverse resources. This music making process allows an opportunity for exploration of self and others, thus encouraging an environment fostering social emotional awareness and diversity, equity and inclusion.

The elementary music curriculum instruction requires:

- a learner-centred music making environment with a designated music room including space for movement and showcasing elementary classroom instruments
- a music specialist with formal musical training and knowledge of elementary music education
- a minimum of 90 minutes of music instructional time per 6-day cycle (5% time on task) for curriculum outcomes to be achieved

Physical Education

Description

The aim of the physical education curriculum is to provide opportunities for students to develop knowledge, skills, and positive attitudes toward active living. The curriculum will support students in acquiring the understandings and skills to engage in movement activities and to develop a solid foundation for a balanced lifestyle.

The specific outcomes for Grades K-6 physical education curriculum are organized within three goals. The goals are interdependent and are of equal importance. The three goals for students from kindergarten to Grade 6 are the following:

- Active Living - Students will enjoy and engage in healthy levels of participation in movement activities to support lifelong active living in the context of self, family, and community.
- Skillful Movement - Students will enhance quality of movement by understanding, developing, and transferring movement concepts, skills, tactics, and strategies to a wide variety of movement activities.
- Relationships - Students will balance self through safe and respectful personal, social, cultural, and environmental interactions in a wide variety of movement activities.

Science Grades 1-6

The PEI science curriculum is guided by the vision that all students, regardless of gender or cultural background, will have an opportunity to develop scientific literacy. Scientific literacy is an evolving combination of the science-related attitudes, skills, and knowledge that students need to develop inquiry, problem-solving, and decision-making abilities, to become lifelong learners, and to maintain a sense of wonder about the world around them.

1SCIA Science

Description: Through an inquiry process, learners will develop scientific literacy in the following areas: Our Senses, Materials, Needs and Characteristics of Living Things and Daily and Seasonal Changes. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, social studies, health, technology, and visual arts.

2SCIA Science

Description: Through an inquiry process, learners will develop scientific literacy in the following areas: Properties of Solids, Liquids and Gases, Life Cycles and Motion. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, social studies, health, technology, and visual arts.

3SCIA Science

Description: Through an inquiry process, learners will develop scientific literacy in the following areas: Plants and Soils, Invisible Forces, and Materials and Structures. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, social studies, health, technology, and visual arts.

4SCIA Science

Description: Students will address science-technology-society-environment (STSE), skills and processes, knowledge and attitude outcomes in the following topic areas: Habitats and Communities; Light; Sound and Rocks, Minerals, and Erosion. The topics are supported by literature selections that allow for integration with other subject areas such as language arts, mathematics, social studies, health, technology, and visual arts.

5SCIA Science

Description: [*see Grade 5 Integrated Curricula \(5INTA\)*](#)

6SCIA Science

Description: [*see Grade 6 Integrated Curricula \(6INTA\)*](#)

Social Studies Grades 1-6

1SOCA Social Studies

Interactions

Description: Through an inquiry process, learners will investigate who they are, needs and wants, how people interact with one another and caring for their environment. Throughout these topics, learners will discover their own identity as well as the concept of interactions.

2SOCA Social Studies

Change

Description: Through an inquiry process, learners will investigate how people change, how people contribute to change, and the importance of sustainability to our future. Throughout these topics, learners will explore the concept of change and how it affects their daily lives, the lives of others, and the community.

3SOCA Social Studies

Provincial Identity

Description: Through an inquiry process, learners will investigate Prince Edward Island's diverse cultural identity, climate and vegetation, and physical features. Throughout these topics, learners will explore the concepts of provincial identity, active citizenship and decision-making.

4SOCA Social Studies

Exploration

Description: The Grade 4 social studies curriculum focuses on Exploration. In Units 1 and 2, students will develop both an understanding of what exploration is, the various aspects of exploration including stories of impact on both the people exploring and the people, place, or idea explored. In Unit 3, students study the physical environment of the world, noting similarities and differences in physical features in various parts of the world. Students examine the concept of how humans and the environment interact. Students have the opportunity to examine how humans have impacted the environment and how the environment has impacted where people live and work. The final unit concentrates on Canada and examines the physical landscape of the country, the human landscape, the political landscape, and finally the symbols that give us our identity.

5SOCA Social Studies

Description: see [Grade 5 Integrated Curricula \(5INTA\)](#)

6SOCA Social Studies

Description: see [Grade 6 Integrated Curricula \(6INTA\)](#)

French Immersion Programs

Introduction

French immersion is a school program designed to develop bilingual fluency in students as well as positive attitudes towards the French language and culture.

Objectives

- To enable students to pursue their education in either French or English.
- To develop skills for employment in which the working language is either French or English.
- To enable students to live in either English or French communities with linguistic and cultural ease.

Early French Immersion (EFI)

Starting at the kindergarten level, all or most of the instruction is given in French in all subjects. An English language arts program taking up 25% of the school day is introduced at Grade 4.

An approximate breakdown of time allocated to the French components in elementary school is as follows:

Kindergarten, Grades 1-3	- a minimum 90% French instruction
Grades 4-6	- a minimum 65% French instruction

The Department of Education and Early Years has authorized programs of study for students in kindergarten to grade twelve French immersion.

Middle Immersion (MI)

The middle immersion program begins at grade four. Most of the instruction is given in French. An approximate breakdown of the time allocated to the French/English components in elementary schools is as follows:

Grades 4-6	- a minimum 75% French Instruction
------------	------------------------------------

Time Allocation for French Immersion Programs

Kindergarten

It is intended that teachers will use an integrated delivery model through play-based learning. The integration is the drawing together of the natural connection among various curriculum areas to assist children in making sense of their world. It can be facilitated in many ways including literacy and numeracy based integration, project approach through inquiry and social-emotional learning.

Notes:

- 1) A minimum of 90% of instruction time in French is recommended for early immersion programs at this level.
- 2) Locally determined time, music, or physical education could be offered in French to successfully meet this recommendation.

Grades One to Three

French Language Arts 45%	Mathematics 20%
Transdisciplinary Units (Science, Health, Social Studies, Art) 15%	
Physical Education 5%	
Music 5%	Recess 5%
Locally Determined Time 5%	

Grades Four to Six

French Language Arts 25%	Mathematics 20%
Transdisciplinary Units (Science, Health, Social Studies, Art) 15%	
Physical Education 5%	
Music 5%	Recess 5%
English Language Arts 25%	

Notes:

- 1) A minimum of 65% of instruction time in French is recommended for early immersion programs at this level.
- 2) Locally determined time is integrated into language arts.

Although this is expressed in terms of a school day (300 minutes including recess - 5%), teachers will find it useful to think about time for some subject areas in terms of blocks of time rather than a percentage of time of each day.

The middle immersion program begins at grade four. Most of the instruction is given in French. An approximate breakdown of the time allocated to the French/English components in elementary schools are as follows:

Grades 4-6 - a minimum 75% French Instruction

French Language Arts

Vision

The Prince Edward Island French immersion curriculum is based on the vision of educating students who are able to communicate effectively in French, use French as a learning tool, and demonstrate an understanding of various cultures, particularly the culture of Francophone communities.

Description

French language arts make up most of the program in the early grades as teachers develop the four basic skills of listening, speaking, reading, and writing in French. The Foundation for the French Language Arts in Immersion Programs in Atlantic Canada 2001 provides a framework for the French program. A detailed curriculum guide for the French language arts program at each level is available from the French Curriculum Division of the Department of Education and Early Years.

Mathematics (EFI-MI)

Description

Mathematics is more than finding the correct answer. It is a way of making sense of many aspects of the world. Through the study of mathematics, students are able to perceive patterns, comprehend data, perform calculations, make constructions, and reason mathematically.

At the elementary school level, the development of mathematical literacy (numeracy) is the major objective. Mathematical literacy includes the competencies mentioned above, but it also includes being able to communicate about mathematics through speaking, reading, writing, and listening. Elementary students must come to understand the intrinsic utility of mathematics. In doing so, they will realize how

- estimation supplements calculation;
- experience balances innovation; and
- problem-solving techniques aid rules of procedure.

The above viewpoints are derived from the goals articulated by the National Council of Teachers of Mathematics as stated in their recent publications.

More specifically, the goals of the Elementary Mathematics Program are to enable all students to

- learn to value mathematics;
- become confident in their ability to do mathematics;
- become mathematical problem solvers;
- learn to communicate mathematically; and
- learn to reason mathematically.

Living mathematical experiences in French immersion further enhances the learners' communicative abilities. They acquire and develop linguistic abilities in both official languages as many of the skills are transferable, be they mathematical, communicative, problem-solving, communicative, or metacognitive.

As of the 2023-2024 school year, the previously provincially approved resource, *Chenelière mathématiques* (the translation of Pearson's *Math Makes Sense*) is no longer in print. Teachers are encouraged to refer to their curriculum guide for suggested teaching strategies, learning activities and evaluation techniques. As well, a multitude of resources are available on the teacher portal (Learn.edu.pe.ca) for instruction and evaluation purposes. Please feel free to reach out to your curriculum leader for training or with questions on best instructional practices.

Language Arts (English for FI) Grades 4-6

The English language arts curriculum is shaped by the vision of enabling and encouraging students to become reflective, articulate, literate individuals who use language successfully for learning and communicating in personal and public contexts.

The curriculum is defined in terms of outcomes organized around the processes of speaking and listening, reading and viewing, and writing and other ways of representing.

Resources provided for Grade 4 are the read aloud, shared reading, and some of the guided reading books from Literacy Place for the Early Years Grade 3. Additional guided reading materials have also been provided from the Moving Up With Literacy Place Grade 4 titles.

Grade 5 resources include the Strategy units from Moving up with Literacy Place Grade 4, along with a selection of guided reading books from Moving Up With Literacy Place Grades 4 and 5.

Grade 6 resources include Moving Up With Literacy Place Grade 6.

Teachers are encouraged to refer to the Program Design and Components of the English Language Arts Curriculum Guide, both Entry-3 and 4-6 for guidance for appropriate instructional practices around spelling.

Transdisciplinary Units of Study Grades 1-6 EFI

At the grade 1–6 level in Prince Edward Island, the transdisciplinary approach involves the grouping together of diverse subject content as well as competencies around big ideas, teaching these subject areas in a way that breaks down artificial barriers and provides meaningful learning through the inquiry-based approach.

Inquiry-based learning builds on children's natural curiosity about the world in which they live. They grow their curiosity and joy of learning by asking their own questions, seeking information through field work, analyzing and interpreting their findings, and sharing their new knowledge. This approach places students' questions, ideas and observations at the center of the learning experience. It is the intention of this curriculum that the outcomes are taught through an inquiry process.

The following subject areas are completely integrated within the units: **Science, Social Studies, Art and Health.**

There are also curricular links to the following subject areas in each unit: **Literacy, Numeracy and Technology.**

Science (EFI-MI)

The science curriculum must provide opportunities for children to develop a body of scientific knowledge through concrete and manipulative learning experiences. It is important to have an appropriate balance between knowledge acquisition and scientific skill development. While the two can be dealt with separately, it is more appropriate that the science curriculum involve activities which can be used to develop both content and process. As students engage in the inquiry process, they are encouraged to ask questions, to research in seek of answers, to formulate ideas in their own words, to write about their science experiences, to make connections, and to discuss and modify their findings based upon feedback from the teacher and their fellow students.

The primary material used is a kit of various resources and general equipment provided by the Department of Education and Early Years. Other resources, as found in local classrooms, school libraries, and the immediate community environment can also be incorporated to facilitate integration with other curricular areas. Emphasis is placed on having students work with laboratory equipment and everyday materials in order to observe and experiment with the science concepts and processes being studied. Participating in such experiences enables students to question, to communicate, and to understand science ideas meaningfully.

Social Studies (EFI-MI)

In grades 1-3, students begin with a study of self and progress through a study of family structures, the school environment, neighborhoods, and community. The outcomes for Social Studies include the following concepts will be introduced and developed throughout the three years: active citizenship; identity, culture and community; time and place; governance, resources and economy.

In Grades 4-6, concepts in the areas of geography, history, economics, governance, citizenship, entrepreneurship, and human rights are introduced and developed throughout the three years.

In Grade 6, a resource, titled L'Acadie de l'île-du-Prince-Édouard 300 ans d'histoire was distributed in the spring of 2020 and in 2022, an accompanying document was developed with suggestions of activities for students in grades 6 to 9.

Art (EFI)

In grades 1-6 FI, the vision is one of enabling and encouraging students to become creative, reflective, and articulate individuals who use art in learning and communicating within private, public, and technological contexts. Through the transdisciplinary units, students will explore art expression; technique and skills development; aesthetic awareness; and cultural, historical, and environmental awareness as they learn to:

- appreciate the usefulness and value of art in many genres, e.g., drama, music, film, literature, mathematics, science, and technology;
- demonstrate creative power, i.e., display confidence and competence in his/her ability to create art;
- communication through creative media expression; and
- engage in creative thinking and problem solving.

Health (EFI)

Through an inquiry approach as well as direct teaching, learners will develop the knowledge, attitudes, values and life skills that young people need to make and act on the most appropriate and positive health decisions. Learners will learn and practice coping and self-management skills, decision making and critical thinking skills as well as communication and interpersonal skills that will support them in making responsible and informed choices to maintain a healthy self, a healthy community and healthy relationships. The home, school, and community play important roles in contributing to the healthy personal development of learners by providing opportunities for learners to reflect and practice skills for healthy decision making.

In grades 1-3, students will learn about personal health, safety and security, personal responsibility, relationships, decision making and goal setting.

In grades 4-6, students will extend their learning from the primary grades to include topics related to puberty, mental health, interpersonal relationships, personal values and feelings, Internet safety and the concept of sexuality.

Communication and Information Technology (CIT-FI)

Rationale:

To focus on how communication and information technology can be used from kindergarten through Grade 6 across all areas of the curriculum as part of a more global strategy that will contribute to the development of technologically competent and literate individuals graduating from our school system.

Advantages of Technology Integration:

Integration of technology into the curriculum

- ensures that curriculum is the principal focus, rather than technology;
- promotes the development of creative thinking, critical thinking, research, communication, and problem-solving skills;
- provides access to rich resources and learning experiences that can extend far beyond those offered in traditional classrooms;
- motivates students to complete learning tasks and become more readily engaged in their own learning;
- supports current research which suggests that people learn in a holistic fashion rather than in a compartmentalized manner;
- supports contemporary approaches to education such as cooperative learning, constructivism, resource-based learning, and individualized learning;
- provides teachers with an additional means to address multiple learning styles;
- provides students with the opportunity throughout their school career to expand and reinforce their repertoire of technology skills;
- enables students to acquire a better understanding of how to use technology in meaningful ways;
- ensures that all students have the opportunity to develop technological competencies;
- prepares students to select appropriate technologies to complete tasks; and
- provides teachers with an opportunity to model lifelong learning as students witness teachers learning and using new skills for a purpose.

Software, Applications, and Extensions

Approved software, applications, and extensions for student learning can be found by using the following link :
<http://bit.ly/peiapps>

This is a living resource, software, application, and extension are added or removed on an ongoing basis based on an evaluation process. Applications/extensions are available to users who log into their @cloud.edu.pe.ca accounts. These applications may be updated, changed, or added to without notice.

Core French

4FREA Core French

Core Modules:

Échos pro 1 professional bundle	1/t	Contact Leader
Échos 1 literacy package	1/t	Contact Leader

Module 1 – Ma classe et moi

Student text	1/p	104-4524
--------------	-----	----------

Module 2 – Ça, c’est ma journée!

1/p	104-4525
-----	----------

Module 4 – Les animaux et nous

1/p	104-4527
-----	----------

The following modules are available to schools as options once the core modules have been covered or in the case of combined grades (3/4 or 4/5). Schools should only order these modules after consultation with the Curriculum Leader.

Module 3 – Suivez moi!

1/p	104-4526
-----	----------

Module 5 – Allons au festival!

1/p	104-4528
-----	----------

Supplemental Resources

Mes sandwichs (6 books per set)	2 s/t	105-5378
Les animaux domestiques	18/t	OP
À l’animalerie (6 books per set)	3 s/t	104-4418
Au soleil (6 books per set)	3 s/t	104-4419
Le vent (6 books per set)	3 s/t	104-4417

The resources below are included in the Literacy Packet (Echo Pros 1). Please order only if you are missing items from the package.
