Insurable crop	(2) An insurable crop is those crops, varieties or groups of crops that have been approved for insurance coverage by the Board and for which Schedules have been prepared and approved.
Acres of insurable crop group	(3) All acres of an insurable crop group, as identified in section 7, must be offered for insurance coverage in order to have a valid contract of insurance.
Coverage	(4) Those insurable crops identified in the Schedules are eligible for coverage under an individual insurance contract.
Independent applicant	4. (1) For the purposes of the production insurance program, an applicant for a contract of insurance must be financially and operationally independent of all other farm businesses growing the same insurable crop or insurable crop group.

(2) Before separate insurance contracts can be issued for a farm operation with multiple partners or owners, or before insurable crops or insurable crop groups on a farm unit can be split, the insured must provide documents to prove financial independence, as defined in clause 1(o). Documents to prove financial independence

(3) All criteria defined for financial independence must be met or the Corporation shall deem the insureds to be one insured and the applications shall be combined as a single insured and subsection 7(1) applied to the insurance contract as one insured. *Idem*

(4) If, at any time, an insured who claims to be financially independent of another insured is found by the Corporation not to be financially independent of the other insured, the Corporation shall deem the insureds to be one insured, including the application of subsection 7(1), for the crop year and for any subsequent crop years for which the insureds apply for crop insurance. Deemed to be one insured

(5) Where applications for contracts of insurance are made by corporations and partnerships the financial independence of the shareholders or partners from other farm businesses growing the same insurable crop will be factors in deciding eligibility. Eligibility

(6) If an applicant
 (a) is operationally dependent on another insured; and
 (b) has a non-arm's length relationship with that insured,
 the records of the Corporation relating to both the applicant and the other insured may be used to determine the probable yield and the performance index for purposes of setting coverage levels and to determine the premium discount or surcharges and, where such a relationship exists, that person and the other insured will be deemed to be operationally dependent. Operational dependence

5. (1) All fields of all insurable crops and all varieties of insurable crops grown on each field shall be properly identified and declared to the Corporation. Identification

(2) The fields referred to in subsection (1) shall be subject to measurement by the Corporation. *Idem*

6. The premium prescribed under any production insurance agreements shall be reduced by such payments as may be made by the Government of Canada under the Farm Income Protection Act (Canada) and by the Government of Prince Edward Island. Premium

OBLIGATION TO INSURE

7. (1) The insured shall offer for production insurance all acreage of crops identified under an insurable crop group or insurance plan which are grown by the insured on land owned or used by the insured in the Acreage

Premiums

14. (1) The Corporation shall apply a premium discount or a premium surcharge to an insured's total premium costs for each insurable crop group, identified in section 7, based on the insured's relative loss ratio (RLR) for that insurable crop group.

Premium discount
or surcharge

(2) The relative loss ratio (RLR) used to establish the discount or surcharge is the ratio between an insured's loss ratio for an insurable crop group and the loss ratio for the province as a whole for the same insurable crop group over the same period of time.

Relative loss ratio

(3) The loss ratio discount or surcharge will be calculated as follows:

Calculation

(a) for insureds with a loss ratio based on fewer than five years of insurance history, the discount or surcharge percentage will be equal to

$(RLR - 1) \times N \times .1$

(where N = number of years insured);

Discount and surcharges shall be capped at 10% per year, for the first five years;

(b) for insureds with a loss ratio based on five or more years of insurance history, the discount or surcharge percentage will be equal to

$(RLR - 1) \times 5 \times .1$;

(4) In the calculations described in subsection (3), a result less than zero represents a discount from the base premium rate, and a result greater than zero represents a surcharge on the base premium rate.

Idem

(5) In no case may the discount or surcharge calculated under subsection (3) exceed

Maximum discounts
or surcharge

(a) 10% of the base premium amount, in the case of an insured with a loss ratio based on one year of insurance history;

(b) 20% of the base premium amount, in the case of an insured with a loss ratio based on two years of insurance history;

<i>Idem</i>	<p>(2) The Corporation has the right to check and verify production summary information submitted by the insured.</p>
<i>Idem</i>	<p>(3) The Corporation or an agent of the Corporation shall provide to the insured and to the Corporation a production summary for each insured crop or variety grown by an insured client by the final date for filing a Proof of Loss, as stated in the Schedules for each insurable crop or plan.</p>
<i>Idem</i>	<p>(4) The insured may meet the obligations of clause 15(1)(a) by signing the production summary prepared by the Corporation or an agent of the Corporation as stated in clause 15(1)(b).</p>
<i>Idem</i>	<p>(5) The insured's signature on the production summary prepared by the Corporation or an agent of the Corporation shall indicate acceptance</p> <p>(a) of the total units produced and the production to count established for each insurable crop, variety, insurable crop group or plan, as stated therein; and</p> <p>(b) of the final production to count to be used by the Corporation to determine indemnity payments.</p>
<i>Idem</i>	<p>(6) The Corporation reserves the right to adjust the final production to count declared by the insured or an agent of the Corporation for insurable and non-insurable perils in order to establish a final production to count.</p>
Benchmark yields	<p>16. The Corporation shall establish benchmark yields for each insurable crop or variety on an annual basis.</p>
Probable yield	<p>17. (1) A probable yield shall be calculated for each insurable crop or variety annually, and this yield shall be a weighted average of the insured's own production to count for that insurable crop or variety during the most recent ten-year period.</p>
<i>Idem</i>	<p>(2) For the purposes of a probable yield calculation,</p> <p>Probable Yield = total production to count for all years insured / total acres grown for all years insured.</p>
Probable yield with no history	<p>(3) Where no insured's data is available during the most recent ten-year period, a provincial benchmark yield for the insurable crop will be used to establish the insured's probable yield and</p>

(a) if no insured's data is available on any insurable crop within the insurable crop group, as specified in subsection 7(1), the insured's probable yield is equal to the benchmark for the insurable crop;

(b) if the insured's data is available on any insurable crop group, the Corporation may adjust the benchmark if the insured's performance index from another crop group or groups if, in the opinion of the Corporation

(i) the new crop group has similar cultural practices and management requirements as an existing insurable crop groups and an adjustment is deemed warranted,

(ii) a new crop is deemed to be grown to manipulate the production insurance program, or

(iii) past performance in other insurable crop groups shows a trend that would warrant an adjustment.

(4) A performance index is calculated for each insured using the following process Performance index calculation

(a) a ratio is calculated each year for each insured crop by comparing the actual yield for that crop to the provincial average for the same crop of the same year;

(b) a ratio for each crop group is calculated by adding the ratio's for each crop within a crop group and dividing by the number of crops within the crop group that were grown that year;

(c) the performance index is calculated by adding all the yearly ratio's for each crop group and dividing by the number of years insured, up to a maximum of 10 years; and

(d) a 15% sleeve, for an index below or above 100%, is allowed before any adjustment is made to the probable yield, for new crops.

(5) Any insured or those wishing to insure may provide historical production data and these production figures may be entered into the insured's production history and used in the probable yield calculations if: Historical production data

(a) all crops grown in the years to be supplied are included in the data;

(b) the yield and acreage information is verified to the satisfaction of the Corporation;

(c) the yield history provided is for consecutive years dating back from the present crop year.

(6) Where fewer than five years of production to count data is available for an insurable crop, the probable yield calculation will be supplemented with a provincial benchmark yield, that being, $(\text{Benchmark yield} + [N \times \text{weighted average yield}] / (N + 1))$, where N is the number of years for which an insured's production to count records and supplied data records are available, and the weighted average yield for the same insurable crops is the ratio of total production to count to the total planted acres during the years for which production to count and supplied data records are available. Probable yield calculation

Trend adjustment factor	(7) Where industry yields increase over time resulting from improvements in technology, a trend adjustment factor may be added to the calculated probable yield, but any trend adjustment will not apply until after the probable yield calculation includes ten years of insured production to count data.

<i>Idem</i>	(9) Coverage levels selected by the insured shall be applied to the probable yield for each insurable crop to determine the guaranteed yield and for non-yield based plans the coverage level shall be applied to the unit value to establish an insured value for each insurable unit.
<i>Idem</i>	(10) Coverage levels greater than 70% may only be offered for new insurable crops or plans if they receive approval from Agriculture, Agri-Food Canada and the Board prior to being offered.
<i>Idem</i>	(11) Coverage levels up to 80% may be offered to those established insurable crops or plans with fully loaded premium rates which are calculated to be greater than 9%
<i>Idem</i>	(12) Coverage levels up to 90% may be offered to those established insurable crops or plans with fully loaded premium rates which are calculated to be less than 9%.
Guaranteed yield	(13) Guaranteed yield for each insurable crop or plan shall be the product of the insured's probable yield for each insurable crop or plan, the coverage level selected by the insured, expressed as a percentage, and the acres insured under a contract of insurance, expressed on a per unit, insurable crop or plan basis.
Adjustment for late planted acres	(14) The guaranteed yield shall be adjusted on any acres of an insurable crop planted after the prescribed final planting date, as stated in the Schedules.
Reduction, guaranteed yield	(15) The Corporation shall reduce the guaranteed yield on all acres planted after the final planting deadline by 2% for each day the acreage was planted after that date, subject to subsection (15).
Ineligible acreage	(16) Final planting dates are those dates listed in the Schedules and any acreage of a crop planted later than ten days after the final planting date are not eligible for insurance and shall be removed from the insurance contract.

(2) With the exception of tobacco and subject to subsection (1), where a loss or damage occurs to the insurable crop from one or more of the perils covered under the policy and the Corporation permits a Stage I claim, in writing, the production insurance on the affected acreage shall be deemed to be cancelled, and the insurable crop on that portion of acreage shall be destroyed. Stage I claim

(3) Where a crop that is eligible for production insurance is replanted, it must be reinsured, subject to adjustments and the obligation in section 3 to insure all acreage. Replanting

Maximum insured value

(3) Gross production from all Stage II acres must be destroyed prior to processing the Stage II claim unless written permission to do otherwise is received from the Corporation. Destruction

(4) Where loss or damage occurs in Stage II, the Corporation shall establish an indemnity rate by using a sliding scale ratio, based on the number of days a crop has been growing compared to the total number of days to maturity for that same crop and applying this ratio to the insured value range for Stage II losses, as stated in the Schedules for each crop. Indemnity rate

(5) In order for an area to be considered for a Stage II indemnity, the area affected and destroyed must be one continuous area or block and must be at least one acre in size. Minimum Size

(6) Where loss or damage occurs in Stage II and the insured concludes that part or all of the crop is salvageable and marketable, the indemnity will be paid at the Stage III level as prescribed in section 25, provided the insured harvests the affected acres, stores the harvested crop in acceptable storage facilities for a minimum of three weeks, and submits proof that buyers have been contacted and have rejected the crop. No offsetting	(9) The Corporation will pay a Stage II claim without offset by excess yield from remaining Stage III acres where <ul style="list-style-type: none"> (a) coverage is provided in the potato plan for late blight; and (b) coverage is provided for potatoes under Schedule F – Unharvested Potato Acreage Benefit.

Final indemnity	(2) For all yield based plans, a final indemnity under Stage III occurs where the production to count is less than the guaranteed yield for that crop or variety, and shall be calculated by multiplying the difference between the guaranteed yield and the production to count by the unit price.
Indemnity non-yield based	(3) For non-yield based programs, the Stage III indemnity shall be calculated, as set out in the Schedules for each insurable crop.
Determination	(4) With respect to tobacco crops, the production to count and guaranteed production shall include all acres insured, but for all other insurable crops, the production to count and guaranteed yield shall include all acreage, except acreage included in Stage I.
Storage	(5) The insured shall store all insurable crops or varieties that have been harvested separate from each other, and shall keep these insurable crops or varieties separate from other crops produced by the insured or by other farm businesses growing the same crop, so that the Corporation can measure production to count and adjust a loss.
