The definition of “C & D debris” is being clarified as excluding wood or lumber that has been treated or coated with a protective coating containing concentrations of lead that does not pass a lead leachate test. The name of the Trigen Energy From Waste plant is being updated to the PEI Energy Systems plant, and the definition of “special waste” is being amended to clarify that materials containing a concentration of asbestos dust or asbestos fibres greater than 1% by weight, and other materials that in the opinion of the Minister are appropriate for disposal as special waste, must be treated as special waste.

SECTION 2 revokes section 59 of the regulations and substitutes a new section 59 which specifies 4 types of C & D debris that may be disposed of in an excavation pit rather than in a C & D disposal site. The excavation pit must be one that is operated under a permit pursuant to the *Environmental Protection Act* Excavation Pits Regulations and the placement of the materials must be in accordance with the pit restoration plan approved by the Minister under those regulations.
